*We have stakes in 3 non-consolidated subsidiary not accounted for by the equity method and 3 affiliates not accounted for by the equity method, however these have been omitted as they are immaterial.

YAMATO KOGYO CO., LTD.
OPERATING RESULTS FOR THE SIX-MONTH PERIOD
ENDED SEPTEMBER 30, 2012

1. Business Performance and Financial Status

(1) Business Performance

① Status During the Current Mid-Term Consolidated Accounting Period

The business environment for Yamato Kogyo Group (the Group) during the current mid-term consolidated accounting period continues to lack increase in demand for steel product.

In Japan, the demand for steel continues to struggle. The sales prices of structural steel and those of scrap steel, the main raw material, also remained sluggish. In South Korea and Thailand, where we have consolidated subsidiaries, and in the United States and the Kingdom Saudi Arabia where we have affiliated companies with equity method applied, the business performance between January and June of 2012 was reflected in the current mid-term accounting period.

YK Steel Corporation in South Korea, strove to strengthen our cost competitiveness through plant and equipment upgrades.

United Steel Company ("SULB") BSC(c) (referred to hereafter as "SULB"), a company in Bahrain accounted for by the equity method, has not significantly impacted the results during the second quarterly consolidated cumulative period under review since the factory is under construction.

As a result of the above, sales for the current mid-term consolidated accounting period were 79,802 million yen (an increase of 1,654 million yen in comparison with the same period in the previous year), operating income was 2,226 million yen (a decrease of 351 million yen in comparison with the same period in the previous year), ordinary income was 7,229 million yen (a decrease of 246 million yen in comparison with the same period in the previous year), and the net income was 4,778 million yen (an increase of 343 million yen in comparison with the same period in the previous year).

Please note that the exchange rates, used to convert profits and losses in financial statements of overseas subsidiaries and affiliates, are as follows:

(Each company's accounting period is from January to June, 2012)

Average rate: 79.77 yen/U.S. dollar, 2.57 yen/baht, and 14.31 won/yen

The average exchange rates for same period in the previous year are as follows:

(Each company's accounting period is from January to June, 2011)

Average rate: 81.77 yen/U.S. dollar, 2.68 yen/baht, and 13.47 won/yen

We report the business results of the segment as follows:

Starting with the first quarterly consolidated accounting period, the previous reportable segment "Heavy-duty machining" is included in "Steel (Japan)."

Comparisons and analyses for the second quarterly consolidated cumulative period under review are based on the figures effective after the changes made to the segment categories.

● Steel (Japan)

While the demand for steel struggled to grow, sales prices of structural steel and those of scrap steel, which is the main raw material, hovered at a low level. As a result, sales were 18,054 million yen (a decrease of 3,801 million yen in comparison with the same period in the previous year), the operating income was 206 million yen (a decrease of 709 million yen in comparison with the same period in the previous year).

● **Steel (South Korea)**

The slump in demand for construction continues to place a strain on the business. Nonetheless, sales were 25,966 million yen (an increase of 2,366 million over yen in comparison with the same period in the previous year), the operating income was 476 million yen (an operating loss of 186 million yen was posted during the previous second quarter).

● **Steel (Thailand)**

Sales were 32,740 million yen (an increase of 2,081 million over yen in comparison with the same period in the previous year). Meanwhile, due to the exacerbating market competition, the operating income was 1,727 million yen (a decrease of 466 million yen in comparison with the same period in the previous year).

● **Railway Track Accessories**

Sales were 2,900 million yen (an increase of 1,019 million over yen in comparison with the same period in the previous year), and the operating income was 398 million yen (an increase of 264 million over yen in comparison with the same period in the previous year).

● **Other Business Sectors**

Other sales were 138 million yen, (a decrease of 11 million yen in comparison with the same period in the previous year) and operating income was 10 million yen (a decrease of 16 million yen in comparison with the same period in the previous year).

② **Future Outlook**

The forecast for the entire fiscal year is as follows: Sales of 150,000 million yen, operating income of 4,000 million yen, ordinary income of 13,000 million yen, and net income of 8,000 million yen.

This forecast reflects the anticipated performance of Saudi Sulb which is already operating. However, SULB, which is not reflected in the consolidated performance forecast, since at this point, there are many uncertainties involved. Once we are able to forecast SULB's operations, we will reflect those in future consolidated performance forecasts.

Please note that the exchange rates used to convert revenues and expenses of our overseas subsidiaries and affiliates are based on their fiscal year, January to December, 2012. The rates are as follows:

Average rate: 78.17 yen/U.S. dollar, 2.50 yen/baht, and 14.62 won/yen

(2) Analysis of Financial Status

Total assets at the end of the current mid-term consolidated accounting period year were 235,424 million yen, an increase of 5,084 million yen in comparison with the end of the previous consolidated fiscal year. This was due to increase in cash and deposits.

Liabilities were 44,729 million yen, a decrease of 2,088 million yen in comparison with the end of the previous consolidated fiscal year. This was due to decrease in loans payable.

Also, net assets were 190,694 million yen, an increase of 7,173 million yen in comparison with the end of the previous consolidated fiscal year. This was due to factors such as increase in net income, decrease by the payment of dividends, and increased of 2,575 million yen in foreign currency translation adjustment.

Please note that the following exchange rates are used in preparation of financial statements for overseas subsidiaries and affiliates at the end of the current consolidated fiscal year.

(Each company's accounting period is from January to June, 2012)

79.31yen/U.S. dollar, 2.50 yen/baht, and 14.55 won/yen

Also, exchange rates for the end of previous consolidated fiscal year are as follows:

(The end of fiscal year for each overseas company is end of December 2011)
77.73 yen/U.S. dollar, 2.45 yen/baht, and 14.84 won/yen

(Cash Flows from Operating Activities)

The increase in funds from operating activities was 8,029 million yen, primarily due to the income before income taxes, and cash dividend from affiliated companies in U.S. with equity method applied.

(Cash Flows from Investing Activities)

The decrease in funds from investing activities was 32,482 million yen, primarily due to payments into time deposits.

(Cash Flows from Financing Activities)

The decrease in funds from financing activities was 2,566 million yen, due to repayment of loans payable and payment of dividend.

With the addition of a 986 million yen, in effect of exchange rate change on cash and cash equivalents, the balance of cash and cash equivalents at the end of the current consolidated fiscal year was 21,854 million yen, which is a decrease of 26,033 million yen in comparison with the end of the previous year.

(3) Basic Policy Regarding Profit Allocation and Dividends for the Current and Next Fiscal Year

We believe that the dividend shall be determined in view of the Group's consolidated performance, financial situation, and development of future policies based on internal reserves.

Regarding the dividend for the current fiscal year, the plan is for an annual dividend of 30 yen per share, with interim dividend of 15 yen per share, and the end-of-term dividend of 15 yen per share.

(4) Business Risks

Following is a description of the main items we consider to be possible risk factors involved in developing the Group's business. Items relating to the future reflect our company's judgment based on data as of today.

① Latent Risks in Doing Business Overseas

The Group's manufacturing and sales activities are not only in Japan, but also in the U.S., Thailand, South Korea, Kingdom of Saudi Arabia, and the steel plant is being constructed through a joint company in Bahrain in the Middle East, as we are developing a global business targeting the world market.

When entering overseas markets, there is a possibility that terrorism, war, and other factors could arise in various countries, causing social unrest, and having a huge impact on a company's results and financial standing. Moreover, problems in conducting business could also arise such as unpredictable changes in the political or legal environment, or changes in the economic environment in various countries.

② Exchange Rate Fluctuations

The Group is developing global operations which target world markets, thus the performance of subsidiaries greatly affects consolidated business results. Since figures in the consolidated financial statements are converted to yen from the local currencies, the financial standing can be affected by the exchange rate. Also, foreign currency holdings make up a high percentage of the Group's cash and savings. Generally, appreciation of the yen will have a negative influence on our company, and on the contrary, depreciation of yen will have a positive influence.

③ Fluctuations in Sales Prices and Scrap Prices

The performance of the Group's vital steel business is greatly affected by fluctuations in sales prices of products and the scrap prices, the primary raw material. These market prices can be greatly affected by the external environment, and first and foremost, the domestic and foreign economic situation.

④ Electrical Power Risks

Since our Company's Group is an steel producer using electric furnaces to melt scrap steel which operates on a global scale and utilizes large amounts of electrical power, the Company's performance could be negatively impacted if there are steep unit price increases in electrical power and if there are restrictions of electrical power consumption.

2. Management Policy

(1) Basic Business Policy

We have served as a responsible member of the business community and strive to manufacture high quality and high value added products based on customer needs. We utilize scrap steel to make final products in order to respond to global needs to conserve energy and resources, and we are striving on a global scale to meet the challenge of environmental protection, which is the most pressing task of modern society. We make products that enable high-speed and high-volume rail and ocean transportation. With all of its products, the Group contributes to the betterment of society and the economy, through the development of its domestic and global business enterprises.

(2) Our Target Business Indicator

We have been promoting the decentralization of investments by primarily investing in overseas business, so as to achieve a management environment capable of responding to dramatic changes in the structure of the global economy, and to avoid a unipolar approach to conducting business. We will conduct our business with an emphasis on cash flow, aiming to invest in future growth fields, while maintaining a sound financial standing.

(3) Medium- and Long-term Corporate Business Strategy, and Challenges Facing the Company

In the business areas in which the Group deals, we anticipate increasingly vigorous competition with both foreign and domestic manufacturers in the future. Under such tough business environment, we will aim to improve productivity and reduce costs by renewing and expanding manufacturing facilities at our operations in Japan and overseas, so as to achieve greater profitability as a manufacturing group. Furthermore, we are holding technical conferences among the steel manufacturing companies in our group, exchanging information and striving to raise the level of our technology.

In addition, on the basis of its structure as a holding company, the Group will look at how it can contribute to society from a variety of standpoints. The Group will maximize the unique qualities and functions of each company under its umbrella, and will promote an active and harmonious group business, as it develops its operations to target the global market.

Our Company established SULB in Bahrain in the Middle East, as a joint venture with capital participation of 49% from our Company. SULB will produce structural steel, primarily focusing on the wide flange beams. Regarding the construction to integrate direct reduction iron production, steel making and rolling, currently, installation of equipment has finished. Then we are proceeding to preparation toward commencement of operations.
